ABSTRACT/CONTENT

Solve economy no.1- Raise bond, sell US bond to get money. Select the potential enterprise to lend out loans. How to know they are good enterprise having ethics and honesty, not cheat Govt money, and flee, need have free press, and freedom of speech. They can help to provide the true info. Also monitor the enterprises no corrupts, no take bribe, and monitor govt too. Lend out money to help cash flow no.1, expand not so quick, enterprise expand need find the right people to help the proprietor, must be gradual, recruited, take time to know their loyalty, honesty, good character, good abilities, then can expand and let them look after the expansion. Proprietor cannot look after so big areas. Hence good character, honesty, abilities all management and staff must have. Do not recruit based on same political thought, depend on good character, honesty, moral. These good people must be loyal to ruler, all colleagues and all Chinese people, even to enemy security law people. Just like me, good to all.

HK to recover, same strategy as China, raise bonds to lend money to good character, honesty, potential enterprise to solve their cash flow, avoid they bankrupt. Same, need free press, and speech to search for them and monitor govt, councilors good performance. Select leaders be responsible, seeing wrongs, subordinate mistake must chastise, no timid or protect wrong subordinates, eg seeing firework display harm environment, should interfere, stop subordinate. Afraid of subordinates, timid, cannot be good supervisor.

More listen to people, even they are not rich or powerful but they are wise. Ruler and leaders can think wrong, normal, once hearing the right perspective, should amend. No revenge, otherwise nobody give wise and right opinions. Esp leaders not and ruler not know everything, eg AI Robotic and AI female robot, cannot discern real or robotic female, can be superhuman affect human existence. AI female robot replaces wives, affect born children, no continue human species. New policies need to consult the public before implement, let them input more perspectives, no pass law in a day or a week, without time for detail discussions. Finding laws which are wrong, affect hk and china future, Art23 & Bylaw, must revoke, like Australia Govt does on wrong/obsolete law. Listen to society can avoid country make mistake, eg hit Japan, then miss out a lot of investments from Japan, affect china income. Beside military conflict affect world peace. Japan may develop nuclear, space technology to affect china. Harmony is best, must patch up with Japan. Same policy to the world. Continue to lead in investments is long term correct strategy for good economy, borrow money from bond is short term, temporary means to help enterprises, not for paying recurrent Govt expenses & salaries. Economy bad, countrymen used up saving, no more money to buy bond. Henc bond is temporary to help enterprises to recover from cash flow, china peaceful policy will lead in investment continuously, then enterprises will develop well, whole china and hk economy will be good.

Security law unlawful, harsh to hit people, enterprises, banks, interfere with their normal operation, affect their business, only harm economy and regime, not right method to protect chairman and his regime. Rule well, love people, no oppression, no abuse power, empathy on accidents & disasters, give them good livelihood, follow

Lord teachings will protect chairman and his regime. Also, all righteous colleagues will support chairman. No revolt. They are good colleagues, not shoe shiners who only care for self-benefits, no ethics.

Follow the wind, support chairman wrongs, which harm chairman regime and country future, and will revolt chairman like Chao Ko when controlled whole China. Hong Kong must reform the existing dishonest election system for LegCo & District Councilors. Elect the right people to serve Hong Kong, no political appointment to select selfish, lazy & incompetent shoe shiners working for self-benefits only, ignore Hong Kong long term prosperity and future. All leaders must be openly elected, competing with each others, Government senior positions & heads must compete with private. All serve on fixed terms of years. Renewal must be based on past performance. Then no lazy & redundant civil servants.
